

**COMPETENCE ASSURANCE  
MANAGEMENT SYSTEM**

Better resource utilization and efficiency, with the ability to benchmark against best practice.

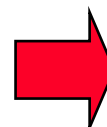

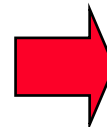

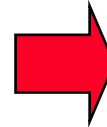

Increased nationalisation of the workforce through more targeted training and development, and the objective measurement of 'right person for the right job'.

Improved safety performance from more competent staff, with verifiable competencies in relevant technical and safety / emergency response fields.

By defining the skills, knowledge

and attitudes by staff to perform their duties competently, and providing the training and support to ensure they achieve these,

we tie together the 3 key elements of business:

**BUSINESS  
ELEMENTS**

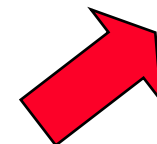

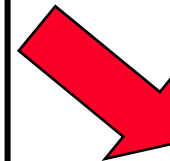

1. Business Plan(s)
2. Operations and Maintenance Strategies
3. Staffing policies
4. Standard Operating Procedures

**PHYSICAL  
ELEMENTS**

1. The Assets
2. The Systems
3. The Equipment

**PEOPLE  
ELEMENTS**

1. The Teams
2. The Individuals

**SYSTEM**

A structured system provides assurance for the business.
